UNIQUE PROPERTIES OF KANGEN WATER

1. POWERFUL ANTI-OXIDANT

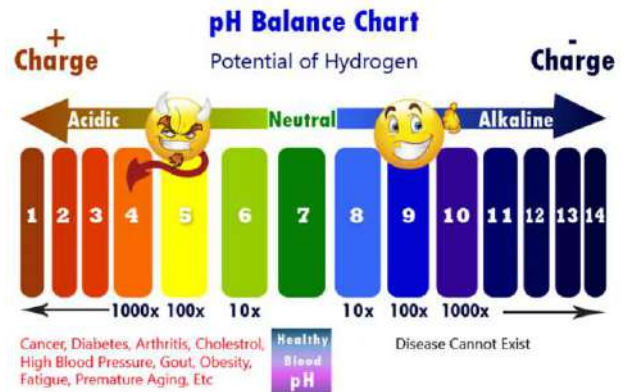

Kangen water provides extra electrons that neutralize destructive free radicals circulating throughout the body. Kangen water carries a high negative ORP (**Oxidation-Reduction Potential**) when it is first produced, making it a potent anti-oxidant.

The higher the negative number the greater the potential to reduce the levels of Oxidation in the body.

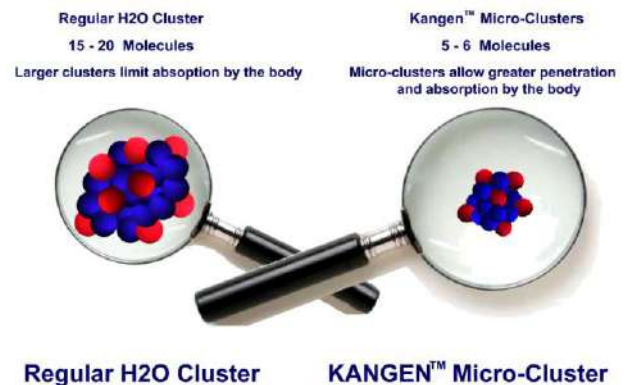

2. ALKALINITY

Kangen water raised tap water pH by ionizing or splitting the water molecules (H_2O resulting in the ions H^+ (hydrogen with a positive electrical charge), and OH^- (hydrogen with negative electric charge), as well as ionic alkaline minerals.

3. MICRO CLUSTERED

The process of ionization reduces the size of the water cluster by two thirds and creates a hexagonal shape. Similar, hexagonal water clusters easily hydrate the cells, enhancing waste removal.

4. HYDROGEN ENRICHED WATER

The molecule of hydrogen water is small enough to penetrate into cells deeply. The utmost thing is hydrogen water can neutralize ROS (Reactive Oxygen Species) which are notorious for destroying normal cells or distorting DNAs. Besides, you can also enjoy helpful minerals dissolved in hydrogen water.

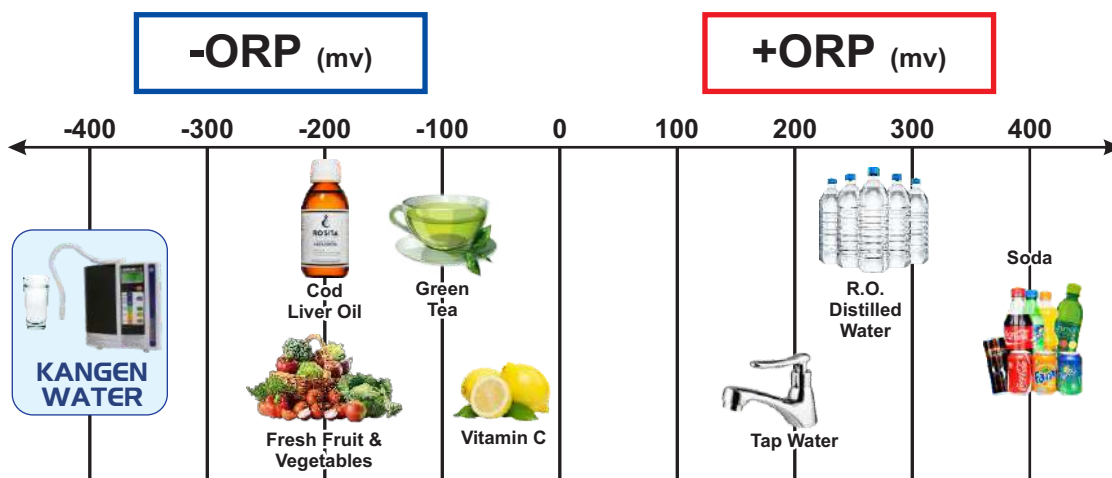

HEALING IS VOLTAGE !

How to Recharge Your Body-Battery

Every cell in the body is designed to run at -20 to -25 millivolts. To heal, we must make new cells. To make a new cell requires -50 millivolts. Chronic disease occurs when voltage drops below -20 and/or you cannot achieve -50 millivolts to make new cells. Thus chronic disease is always defined by having low voltage. This book tells you how to measure your voltage in each organ, how to correct it, and how to determine why your voltage dropped enough to allow you to get sick.

Kangen Water is the king of antioxidant

DR OTTO HEINRICH WARBURG

Discovered the real cause of cancer in 1923 and received the Nobel Prize for Physiology in 1931

In his work the metabolism of tumours he demonstrated that all forms of cancer are characterized by two basic conditions :

ACIDOSIS and **HYPOXIA** (lack of oxygen).

Cancerous tissues are Acidic, Healthy tissues are Alkaline.

"Deprive a cell 35% of its oxygen for 48 hours and it may become cancerous."
